AWC B-400 High Foaming Polycarbonate Container Washing Compound

Description and Use

AWC B-400 is a formulated alkaline detergent for Polycarbonate Containers which has the following capabilities:

- Improves washing efficiency by facilitating soil removal from containers and by keeping that soil dispersed and suspended in solution.
- Controls any metal contaminants that may be present in the wash water.
- Prevents scale build-up on the polycarbonate containers and on the equipment even when high hardness water is used.
- May be used in various CIP applications.

Typical Properties

Appearance	Light Yellow Liquid
Odor	Slight Surfactant
pH	9 - 10
Specific Gravity	1.05 ± 0.03
Solubility	Completely soluble

Chemical Feeding And Control

Dosage rates will vary depending on the condition of the polycarbonate containers. Generally dosage will be between 3 – 6 mL of concentrate per bottle.

Safety and Handling

Store in a cool dry place. Keep containers tightly closed when not in use. **Inhalation** not considered a problem. **Skin Contact:** Wash with soap and water. If irritation persists, get medical attention. **Eye Contact:** Immediately flush with clear water for 10 minutes and get medical attention.

Packaging

AWC B-400 is packaged in 55-gallon, non-returnable plastic drums.
